Lab Intensive #1

Saying Lots, Saying Little

Managing the Limitations of GenAI and
Introduction to Party Rock!

First Essay Exam Reflection

Take 2-3 minutes to reflect on your exam exam response:

What part of your response was strongest?

Consider your clearest arguments, best examples, or most insightful analysis.

What would you change if you could rewrite?

Think about areas that felt rushed, unclear, or underdeveloped.

Introducing... Party Rock

What is PartyRock?

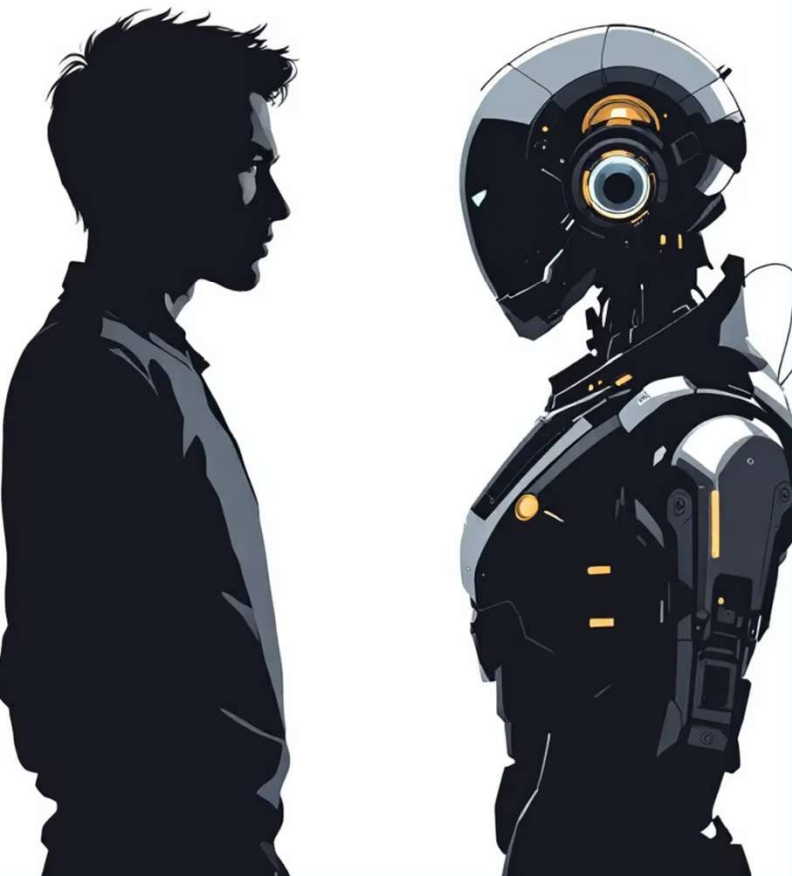

PartyRock is a space where you can build AI-generated apps in a playground powered by Amazon Bedrock. It's a fast and fun way to learn about generative AI.

How does it work?

PartyRock uses foundation models from Amazon Bedrock to turn your ideas into working PartyRock apps. You can create apps and run them until your Backstage page shows that you've used 100 percent of your PartyRock credit. To get the most out of your PartyRock experience, you can do the following:

1. Get started by creating a PartyRock app. This provides you with a starting place to learn in.
2. Build your app by editing UI elements called widgets. You can change widget prompts so that they connect to each other and accomplish different things.
3. Take the next steps and publish your PartyRock app so you can share it with others.

TIP: PartyRock is intended for use with English language prompts only.

Party Rock App demo using StudySync

- ▶ StudySync is an LLM Learning Companion created by Professor Kelly
- ▶ An GenAI application designed to assist your exam preparation and study strategies!

Saying lots while saying little...

Fluent, but Shallow

LLMs excel at producing grammatically correct, well-structured text that sounds impressive but often lacks depth or genuine insight.

Cannot Generate New Evidence

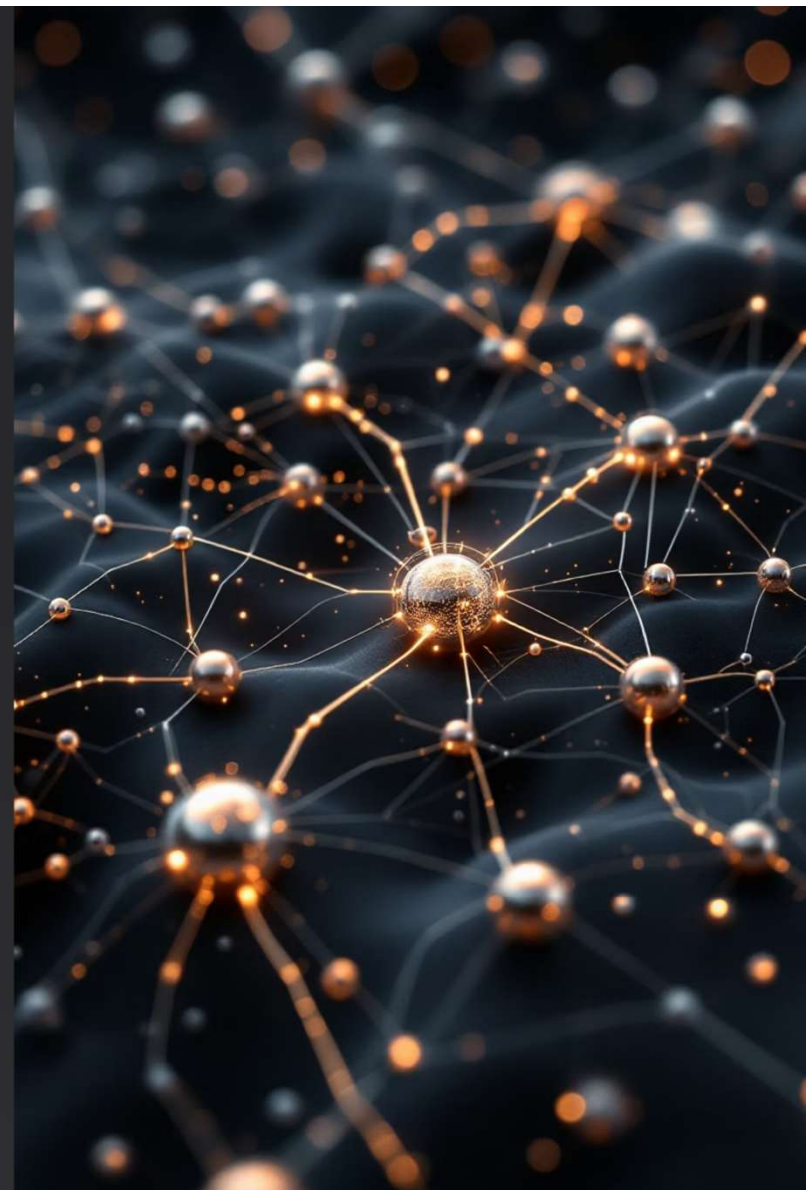

AI can only recombine existing information from training data—it cannot conduct research, make observations, or create original evidence.

Pattern-Based Responses

Responses rely heavily on statistical patterns rather than true understanding, leading to generic leading to generic or contextually inappropriate outputs.

Says Much, Means Little

LLMs tend to produce verbose responses that feel comprehensive but often avoid taking clear taking clear positions or making specific claims.

How to make use of LLMs ethically

- ▶ Academic ethics
- ▶ Personal ethics
- ▶ Professional ethics

How to make use of LLMs ethically: in academics

College Policy No. 5076 Student Community Guidelines

This policy applies to all students and student clubs and organizations on campus, as well as those participating in off-campus OCCC activities, classes, programs, or events. Student Clubs and Organization are also responsible for adhering to the current Student Club and Organization manual. The following misconduct is prohibited and is subject to disciplinary action.

2. Academic Misconduct: Cheating, plagiarism, unauthorized collaboration, alteration of academic materials or other academic misbehavior as specified in the **Academic Integrity policy (policy 4016)**.
